

About

Multi-strategy multi-manager fund, which invests in diversified strategies in the Brazilian fixed income, variable income and foreign exchange markets and, to a lesser extent, abroad. The management seeks to explore the best opportunities in terms of risk X return available in organized markets, preferably using high liquidity assets. The consistency of returns and the emphasis on capital preservation are its main differentials. The management team adopts the multi-manager style, where managers, with different and complementary styles, divide the total risk of the fund among themselves and have operational autonomy. The fund uses derivative instruments, both for portfolio protection and to leverage gains.

Objective and Strategy

Absolute returns. Substantially outperform the benchmark (CDI) in the long term
